

Approved information

Judgement of proportions

On the breeding leader meeting in 2018 it was approved to add a working rule with a maximum score for proportions in regards to chest width. It was decided to let the breeding judge seminar decide how this should be phrased and the rule should be valid in 2018.

At the breeding judge seminar 2018 the following working rule for judgement of proportions was decided:

For marks of 8.5 or higher for proportions: stallions need to have 35 cm or more in width of chest and mares 34 cm or more.

This rule is valid as of 2018 and will be added to the FEIF Breeding Rules and Regulations in 2019.
